Site Strategies:**Site Validation Level: 0****Strategy: 5-450.1 Objective:** No Onsite Options: Consider Offshore Containment/Recovery/ART**Strategy:** This site is difficult to protect. Mechanical shoreline protection techniques are not likely to be effective because of high wave energy and rocky conditions at the site.

- Recommended response strategy is on-water containment and recovery (e.g. towed boom arrays).
- Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) to reduce the volume of oil reaching the site.
